

Official Quotation

Company Address: 2921 Stockton Blvd. Suite 1810, Sacramento CA 95817

Phone: 916-252-0068

Fax: 916-252-0068

Novogene Representative: Brianna Mahoney

Representative email: brianna.mahoney@novogeneusa.com

Novogene Technical Support: Archana Lovett

TS email: archana.lovett@novogeneusa.com

Purchase Order Receiving Email: purchaseorders@novogeneusa.com

Quote No.: NVUS2025102858

Date Issued: 2025-10-28

Validity: (30 days) 2025-11-27

Payment Terms: Net 30 days

CUSTOMER INFORMATION	
Institution	Dana Farber Cancer Institute
Shipping Address	450 Brookline Avenue Boston MA 02215 United States
Customer Name	Xiaolu Wang
Email Address	xiaolu_wang@dfci.harvard.edu

No	Product Name	Description	UNIT PRICE	Currency	QTY	Total price
1	Human mRNA Sequencing (WOBI)	mRNA library preparation (poly A enrichment)	124.00	USD	4	496.00
2		NovaSeq X Plus Series (PE150) (6 G raw data per sample)				
3		Data quality control				
4		RNA sample QC	15.00	USD	4	60.00
5		SFTP	0.00	USD	1	0.00
Total:						556.00
Grand Total						556.00

1. Overview of Service	
Product Name	Human mRNA Sequencing (WOBI)
Species	Human - Human
Sample Type	RNA
Sequencing Platform & Strategy	NovaSeq X Plus Series (PE150)
Data Requirement	6 G of raw data per sample
No. of Sample	4

Data analysis	Data quality control
Turnaround Time	9 working days starting after we receive confirmation of the sample QC report from customer

2. Sample Submission Guidelines(Human mRNA Sequencing (WOBI))

Library Type	Sample Type	Amount (Qubit®)	Volume	Concentration	RNA IntegrityNumber(Agilent 2100)	Note
Eukaryotic mRNA library (poly A enrichment)	Total RNA (animal, plant, and fungi)	≥ 100ng	≥ 10 µL	≥ 10 ng/µL	≥ 4.0, with flat base line	OD260/280≥ 2.0; OD260/230≥ 2.0; no degradation, no contamination
Eukaryotic mRNA library (poly A enrichment)	Total RNA (Blood)	≥ 400ng	≥ 20 µL	≥ 20 ng/µL	≥ 5.0, with flat baseline	OD260/280≥ 2.0; OD260/230≥ 2.0; no degradation, no contamination
Ultra low input mRNA non-directional library preparation	Total RNA (Non-blood)	10pg≤x≤10ng	≥ 20 µL	/	≥ 5.8, with flat base line	OD260/280 ≥ 2.0; OD260/230 ≥ 2.0, no degradation, no contamination

Notes:

*It is recommended to double the sample amount when feasible, in case library re-construction is needed.

**Note that the sample volume for QC (2µL - 5µL) is excluded from the Sample Submission Guidelines.

3. Bioinformatics Analysis (Human mRNA Sequencing (WOBI)-Data quality control)

Data quality control: filtering reads containing adapter or with low quality

4. Sample Submission

All samples must be delivered to Novogene in accordance to the sample requirements listed above. Please request for the sample submission form and sample submission instructions from the Novogene representative. Samples should be sent to the address below:

Novogene BVT Sample Receiving
9730 SW Nimbus Ave
Beaverton, Oregon 97008

To order, please send us your purchase order and obtain the Sample Submission Form from us.

5. Customer Service System (CSS)

Do you know?

The Customer email address shown on this quotation will automatically become the **Project Owner** on the Novogene Customer Service System. On CSS, you can track and manage the project online 24/7. Please note that only the permittee(s) can access the project

6. Terms and Conditions

By signing below, issuing a PO, and/or making a payment, I hereby confirm my agreement with the information and pricing outlined in this quotation. I acknowledge and comprehend the terms and conditions outlined in points 1-46 below. Furthermore, I acknowledge the bioinformatics specifications in the quote, and I understand that any subsequent requests for changes to the bioinformatics requirements may result in additional costs. I agree to be responsible for such incurred charges.

NAME OF BANK: East West Bank

ADDRESS OF BANK: 9300 Flair Drive, 4th Fl. El Monte, CA 91731

BANK ACCOUNT NUMBER: 8088008480

NAME OF ACCOUNT: NOVOGENE CORPORATION INC

General Terms and Conditions

Service Provision

1. Subject to the T&C, Novogene will provide client as specified in the "Customer Information" above ("Client") with, and/or access to, the services described in Sections 1,2, and 3 above (the "Services").

2. Novogene may subcontract all or any part of the Services to a third-party vendor in the U.S. Novogene and its third-party vendors will not perform any part of the Services overseas without obtaining Client's prior written consent. Nothing herein shall be construed to create any contractual privity between Client and Novogene's subcontractor or vendors. Novogene's Official Quotations and contracts with its subcontractors or vendors shall not be construed to be a part of this Official Quotation.

3. Client warrants that they are duly authorized to order the Services performed by Novogene. At the Client's own cost, they shall be responsible for collecting, transporting, and, if applicable, returning the original "Client Materials" necessary for Novogene to perform the Services, as agreed upon by both parties. Novogene is not liable for any loss, theft, or damage to the samples during the return process. For clarity, it is the Client's responsibility to arrange for the delivery of Client Materials to Novogene's premises. This means that the quotation provided above does not include the shipping and handling cost for transporting Client Materials to Novogene's lab(s). The Client must also ensure they provide Novogene with any relevant information associated with the Client Materials that may be necessary for Novogene's performance of the Services, even if such information is not yet in Novogene's possession. While Novogene may occasionally offer to cover shipping costs for select services and customers, such payment does not alter the terms of this paragraph. The Client acknowledges that Novogene is not responsible for any delays, losses, damages to the Client Materials, or any other issues arising from or related to the shipping process under any circumstances.

4. All Novogene kits, reagents, hardware, software, standard operating procedures, and analysis pipelines are regularly updated to ensure they remain best-in-class. If you require access to historical versions, please contact us proactively, and we will consider your request on a case-by-case basis. Please note that we may not be able to guarantee the availability of older kits, hardware, software, standard operating procedures, or analysis pipelines. We reserve the right to make these updates without prior notice to clients.

5. If our lab receives any pathogen that is potentially harmful to our technicians, that has not been pre-approved and vetted by your Novogene project representative; the samples will be destroyed immediately, and your contract terminated, any associated charges will be invoiced.

6. The turnaround time starts when PO or full payment is received by Novogene, and the client gives confirmation to start library preparation or sequencing after reviewing the sample QC result (note: this condition does not apply to Premade SWIFT, see #7). It excludes the wait time for Novogene to get Client responses for information such as bioinformatics form. For a partial or full lane sequencing project, the turnaround time cannot be guaranteed under special circumstances, such as more than 400 sub-libraries pooled together before sending, special library types with increased pooling coefficients, libraries requiring $\geq 10\text{bp}$ index cycles or any non-PE 150 sequencing approach.

7. Novogene does not guarantee data output or quality for premade library SWIFT sequencing projects. We rely on client-provided metrics for loading libraries onto the sequencer. Turnaround time begins once the samples are checked into the lab, and customers are notified by email when this process is complete. However, please note that turnaround time may be extended if the client does not follow shipping instructions, the sample does not meet minimum requirements, and/or the client has not provided a 24-hour notice to our team prior to shipping samples. While we strive for optimal performance, unforeseen situations (such as instrument malfunction) may occur. These situations are beyond our control and are not covered by our guarantee. Additionally, we may not set up the run exactly as per the

client's initial request; for instance, index reads may be longer than specified. This flexibility allows us to ensure the quickest turnaround while maintaining high-quality results.

8. Please note that samples processed overseas cannot be returned due to governmental regulations.

9. The Service provided is for research purposes only, not for clinical or diagnostic use.

Sample Handling, Requirements, and Quality Control

10. Novogene only accepts DNA, RNA, Protein, Metabolites or Premade library samples being sent in 1.5 ml or 2.0 ml flip-cap microcentrifuge tubes. Incorrect tubes (such as 96-well plates or PCR strip tubes) will cause project delays and an additional handling fee.

11. Before sending Client Materials, Client must accurately provide sample information on CSS, avoiding mistakes, ambiguity, and omission of important instructions.

12. Novogene does not guarantee the quality or quantity of Novogene-extracted Client Materials due to various external variables beyond Novogene's control, including factors such as the timing of sample collection, sample storage conditions, and the choice of buffers used, among others. All samples that undergo extraction by Novogene will incur charges, irrespective of their quality status (Pass, Hold, or Fail), even if the client decides not to proceed with the project after extraction. For more information regarding samples extracted by Novogene, please refer to terms #13 and #14.

13. Novogene will use a set amount of tissue required to fill one nucleic acid, metabolite, or protein extraction. Additional extraction may incur extra charges. Our lab technicians will excise enough tissue for one round of extractions at random. Processing all tissue at the Client's request may result in additional charges. Please inform us if you desire the return of the original materials before the quotation is issued, as additional charges will apply. As a point of clarification, Novogene does not return nucleic acid extracted by our lab. For any queries regarding this process, feel free to consult your Novogene project representative.

14. Extractions performed at Novogene's US Lab with a sample count ≤ 24 will take approximately 5 working days depending on the lab's workload. Novogene requires 1 extra working day for every 12 additional samples.

15. Sample login performed at Novogene's US Lab with a sample count ≤ 150 will take approximately 1 working day depending on the lab's workload. Novogene requires 1 extra working day for every 50 additional samples. If samples do not meet Novogene's shipping guidelines, ≤ 50 samples will take 3 working days, and an additional 1 day for sample increments of 50.

16. RNA, DNA, and Premade library QC with a sample count ≤ 24 will take approximately 2 working days depending on the lab's workload. For projects/batches with a sample count between 25 - 96, Novogene requires 1 extra working day for every 12 additional samples. For projects/batches with a sample count > 96 , Novogene requires 1 extra working day for every 24 additional samples.

17. Sample combination requests will incur an additional fee.

18. The final quantity and quality of samples will be determined based on Novogene's Quality Control (QC) results. Novogene is not responsible for observed differences between samples that fall outside of Novogene's quality standards, including theoretical 'batch effect.' For premade libraries, Novogene does not guarantee similarity between different runs, except for maintaining satisfactory data quantity and error rates for qualifying samples.

19. Novogene charges a \$15 quality control (QC) handling fee for each standard input DNA/RNA sample we process. If a sample does not advance to library preparation, we reserve the right to waive the \$15 handling fee at our discretion to accommodate a replacement sample, under the qualification that the replacement sample proceeds to library preparation. This offer is limited to one waived handling fee of \$15 per contracted sample that does not proceed to library preparation. This policy does not apply to the following workflows (including but not limited to): sequencing only, ultra-low-input (RNA), ATAC-Seq, full-service single-cell, microbial amplicon (16S/18S/ITS), PacBio/Nanopore sequencing (RNA and PCR product excepted), and custom/expedited projects.

20. To ensure Novogene can meet our data guarantee as stated in term 24, the client must confirm their decision to proceed with library preparation or sequencing for DNA/RNA and Premade libraries (both external/internal) samples within 14 days of receiving the QC report. If confirmation is not received within this timeframe, all samples must undergo another QC test before proceeding to library preparation or sequencing. These time frames represent the extent of the guarantee. Afterward, the guarantee will no longer apply without an additional QC. The client is not required to order another QC, but if Novogene does not have a valid QC report to establish a rating, we cannot offer a guarantee, and the client will proceed at their own risk.

21. For Amplicon Metagenomic Services, it is not acceptable to use custom primers that amplify insertion lengths >490 bp (target amplification region + forward and reverse primers + dual 8 bp barcodes). Novogene will not preserve PCR products that fail amplification or are insufficient for one-time library preparation. If you have negative control samples or need to preserve failed/insufficient PCR products, please inform your Novogene project representative before sample submission. If requested in advance, PCR products can be preserved for up to 3 calendar days.

22. Given that we require a specific amount of sample volume for our QC, library preparation (if applicable), and sequencing, if DNA, RNA, and/or premade library samples are received by Novogene with low volume, we will automatically dilute them without confirming with the client first. If you do not wish this to be done, please send the minimum volume of sample specified in your quotation's sample requirements section.

23. Where CLIA does not apply, all remaining tissue samples will be destroyed by Novogene 60 days after the initial receipt date. Any remaining cell samples will be discarded immediately after they are processed. All other remaining DNA, RNA, library, FFPE, Protein, or Metabolite samples will be destroyed by Novogene 60 days after Novogene delivers the data to Client. All remaining custom PCR primers will be discarded 6 months after data release unless extended storage was requested in advance. Any unclaimed samples received by Novogene will be discarded within 30 days of receipt unless contacted by the client. Novogene is not responsible for the return of unused samples. As a point of clarity, Novogene does not return any libraries constructed by our labs. Please contact your Novogene project representative if you need to have any remaining samples returned to you. For clinical services covered under CLIA, Novogene strictly complies with the record retention policy as promulgated by 42 CFR § 493.1105.

Data Guarantee & Quality Control, Demultiplexing, Retention

24. Novogene provides a data output and quality guarantee for samples that pass QC in our regular NGS pipelines as stated in section 1 - Overview of Service. If this guarantee is not met, the client will not be charged for sample QC, library preparation, or sequencing. Specifically, for Plant and Animal Whole Genome Sequencing (WGS) services on the PacBio Revio platform, Novogene guarantees data output for SMRT Cells loaded with only PASS samples. We allow a maximum of 3 samples to be multiplexed in 1 Revio cell from the same project and the same species to meet the guarantee. Different species have varying output guarantees, so clients are encouraged to consult their Novogene project representative for additional details. Data output is also guaranteed for PacBio Plant and

Animal Kinnex Iso-Seq product (sold by M reads). It's important to note that due to pipeline limitations, Novogene does not guarantee the success of library preparation or the amount of data output for PASS samples in other PacBio or Nanopore services.

25. Novogene's premade library sequencing services include a one-time demultiplexing based on the index information provided by the client. An additional demultiplexing fee will apply if any of the following conditions are met: the length of any indices exceeds 10bp for premade library partial lane sequencing projects; the number of premade indices on a single lane (for whole lane sequencing) or in a single library pool (for partial lane sequencing) exceeds 400; demultiplexing with UMIs is requested; or demultiplexing libraries with only i5 on lane sequencing. Novogene will charge for additional rounds of demultiplexing incurred due to the client's index errors.

26. Phix is essential for sequencing low diversity libraries, unbalanced libraries, and libraries with fixed bases on Illumina platforms. Insufficient output or poor data quality may result from not adding or adding less than Novogene's recommended minimum percentage of PhiX. Novogene is not responsible for underproduction of data due to the client not adding PhiX or adding less than the recommended percentage; please consult with your Novogene project representative for guidance.

27. For pre-made library sequencing using custom primers or custom run cycle, Novogene does not supply or QC primers and does not guarantee data output or quality, regardless of the library QC result. Novogene does not guarantee the compatibility of custom primers with Illumina standard primers if used on the same lane.

28. Novogene does not offer partial lane sequencing for single-stranded DNA libraries and must assign increased pooling coefficients for specific library types on partial lane sequencing due to considerations related to library nature and compatibility for pooling. For premade library partial lane sequencing, if the average quoted data output of each library or sub-library falls below 0.5Gb, Novogene cannot be held responsible for any after-sales issues, including low data output. Furthermore, if re-sequencing of a lane or a portion thereof is required due to incorrect information provided by the client, such as erroneous index information or an incorrect library type, the client may incur charges of up to \$3,200 to cover the associated costs. Additionally, if a premade partial lane sample that Novogene marks as a 'Fail' causes data underproduction on other client's samples, the client will be charged proportional to the data loss.

29. In rare cases when the data amount of a 'PASS' DNA/RNA sample is insufficient, additional sequencing will be arranged to reach the quoted amount at no cost to the client. Since this may increase the turnaround time, we generally do not arrange for additional sequencing when the data shortage is less than 2% of the quoted amount. For PacBio Revio WGS projects, data delivery may be slightly below the guaranteed amount by a few Gb due to demultiplexing and data QC. For samples rated as 'Hold' or 'FAIL' in the QC report, Novogene will NOT guarantee the success of library preparation, data quality, or quoted data amount and will charge for additional sequencing of these samples. If a sample is QC'd and constructed into a library but not sequenced, Novogene will only charge for sample QC and library preparation. In the unlikely event a 'PASS' sample does not produce a library, Novogene will not charge a library preparation or QC fee.

30. Novogene will retain all data for 30 calendar days after its release to customers. An extension can be requested and is subject to additional fees. Provided that your Novogene project representative is informed at least 7 days before the end of the initial 30-day period. Please contact your Novogene project representative for more details on these extensions. Please note, this does not apply to fast5/pod 5 data from Oxford Nanopore sequencing. These specific data will only be kept for a maximum of 21 calendar days and will be automatically deleted within a week after customers download them.

Payment and Financial Terms

Payment Requirements

31. All monetary sums referred to in this quote are payable in full without deduction, withholding, or set-off for any reason. Please be advised, unless prohibited by applicable state or local laws, payments made by credit card will incur an additional 3.5% processing fee. If the project is terminated, the amount for the completed part shall be paid. All sums are net of value-added tax and any other applicable taxes or duties, which shall be paid by the customer if applicable.

32. A purchase order ('PO') or payment is required for Novogene to initiate Services. When issuing a PO, Client should include Novogene quotation # in the PO. It is important to note that a PO or full payment is necessary for the release of data, signifying completion of the service.

33. Novogene considers the receipt of Client Materials, prepayment, or PO as an acknowledgment and acceptance of the T&C. On the completion date of Services, Novogene will invoice Client. Client agrees to pay the entire amount of each invoice issued by Novogene within 30 days from the date of the invoice. The invoice will be issued based on the services completed by Novogene.

34. Client shall confirm or reject the settlement via CSS or email within 5 calendar days upon receipt of the final report and sequencing data. If the Client takes no action within the specified period, Novogene will deem the project as settled by default and proceed with invoicing accordingly.

Financial Adjustments and Confidentiality

35. Novogene reserves the right to adjust the quote for the Services if the scope of Services changes, in which event Novogene will not be required to perform the Services unless both Parties agree on the terms of a revised quotation.

36. Price information is CONFIDENTIAL to the parties directly involved with this project, unless disclosure is required by law or legal process.

Legal and Liability Terms

Warranties and Indemnities

37. Novogene shall be free to use for any purposes all general knowledge, skills, and expertise developed or acquired in the course of performing the Services. As between the Parties, Novogene shall own any and all ideas, concepts, know-how, and techniques developed, created, conceived, or reduced to practice by its personnel alone, including all intellectual property and proprietary rights therein. Notwithstanding the foregoing, nothing in this Section shall be construed as a license or grant from the Client to Novogene of any intellectual property rights owned, licensed, or otherwise held by the Client. Furthermore, Novogene agrees that all data, records, and reports produced from the Client's original materials provided under the scope of Services shall be the sole property of the Client.

38. NOVOGENE DISCLAIMS ANY AND ALL WARRANTIES, EXPRESS OR IMPLIED, WITH RESPECT TO ITS PERFORMANCE UNDER THIS OFFICIAL QUOTATION, WHETHER ARISING BY OPERATION OF LAW, BY REASON OF CUSTOM OR USAGE IN THE TRADE, BY COURSE OF DEALING OR OTHERWISE INCLUDING, WITHOUT LIMITATION, IMPLIED WARRANTIES OF SATISFACTORY QUALITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NONINFRINGEMENT AND CONDITION OF TITLE. NOVOGENE MAKES NO WARRANTY THAT ERRORS IN THE PLATFORM WILL BE CORRECTED.

NOTHING IN THIS OFFICIAL QUOTATION SHALL BE CONSTRUED AS PERMITTING CLIENT TO RELY IN ANY WAY ON THE
NOTHING IN THIS OFFICIAL QUOTATION SHALL BE CONSTRUED AS PERMITTING CLIENT TO RELY IN ANY WAY ON THE
CONTINUED USE OF THE SERVICES OR ANY FURTHER DEVELOPMENT THEREOF. THIS DISCLAIMER OF WARRANTIES WILL
APPLY EVEN IF ANY OF THE EXPRESS WARRANTIES SET FORTH IN THIS OFFICIAL QUOTATION FAILS OF ITS ESSENTIAL
PURPOSE.

39. Client will defend, indemnify and hold Novogene harmless from and against all Claims based upon any act or omission of gross negligence or willful misconduct by Client; provided that Novogene (i) provides Client prompt written notice of the claim, (ii) permits Client to have sole control of the defense and related settlement negotiations for such Claim, but Novogene shall have the right to approve any settlement or compromise, which approval will not be unreasonably withheld and (iii) cooperate with, and provide assistance to, Client, at its expense, in connection with the defense and settlement of such claim.

Liability and Limitations

40. IN NO EVENT SHALL EITHER PARTY BE LIABLE FOR ANY CONSEQUENTIAL, INCIDENTAL, INDIRECT, EXEMPLARY OR SPECIAL DAMAGES, HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, ARISING OUT OF THIS OFFICIAL QUOTATION. IN NO EVENT SHALL CLIENT'S OR NOVOGENE'S LIABILITY, RESPECTIVELY, FOR DAMAGES ARISING OUT OF ANY CLAIM RELATING TO THIS OFFICIAL QUOTATION EXCEED THE GREATER OF (I) TEN THOUSAND DOLLARS (\$10,000) AND (II) THE AGGREGATE AMOUNTS PAID AND PAYABLE BY CLIENT FOR THE SERVICES GIVING RISE TO SUCH LIABILITY. THE LIMITATIONS AND EXCLUSIONS OF DAMAGES SET FORTH IN THIS SECTION SHALL NOT BE APPLICABLE TO NOVOGENE'S BREACH OF ITS OBLIGATIONS UNDER A PARTY'S INDEMNIFICATION OBLIGATIONS, OR EITHER PARTY'S GROSS NEGLIGENCE, WILLFUL MISCONDUCT, INCLUDING FRAUD, OR INJURY TO PERSON OR PROPERTY.

41. Novogene is an independent contractor of Client. Neither party will, for any purpose, be deemed to be an agent, employee, or partner of the other. Neither party will have any right or authority to assume or create any obligations or to make any representations or warranties on behalf of any other party, whether express or implied, or to bind the other party in any respect whatsoever.

42. Except for the Client's payment obligations under this Official Quotation, neither party will be responsible for any failure to perform or delay due to causes beyond its reasonable control, including but not limited to acts of God (fire, storm, floods, earthquakes), civil disturbances, disruptions of telecommunications, power or other essential services, Internet service interruptions, labor disturbances, vandalism, computer viruses, changes in laws or government requirements, or malicious or unlawful acts of third parties. If there is a material and unforeseeable change in import duties, export controls, tariffs, or other governmental charges that significantly increases Novogene's cost of performance, Novogene may request an equitable adjustment to the Contract terms. If the parties cannot agree on an adjustment within thirty (30) days, Novogene may terminate the Contract without liability by providing written notice to the other party.

43. This Official Quotation shall be governed and interpreted in accordance with the laws of the State of New York without regard to conflicts of laws principles thereof.

44. In any action or proceeding to enforce rights under this Official Quotation, the prevailing party will be entitled to recover its costs and reasonable attorneys' fees.

45. No term or provision of this Official Quotation may be amended, nor shall any term be deemed waived, except as set forth in writing and signed by both parties.

46. No waiver of any default hereunder or any terms or conditions of this Official Quotation will be deemed to be a waiver of any other or subsequent default of any other term or condition but will apply solely to the instance to which such waiver is directed.

47. Any controversy or claim arising out of or relating to this contract, or the breach thereof, shall be settled by arbitration administered by the American Arbitration Association in accordance with its Commercial Arbitration Rules in the State of New York, and City of New York, and judgment on the award rendered by the arbitrator(s) may be entered in any court having jurisdiction thereof

48. Compliance with 28 CFR Part 202.

a. Client represents and warrants that it is not a "covered person" or a "country of concern" within the meaning of 28 CFR Part 202 (the "Data Security Program" or "DSP").

b. Client agrees to periodically certify to Novogene, in writing Client's compliance with 28 CFR part 202. Client agrees to not evade or avoid, cause a violation of, or attempt to violate any of the prohibitions set forth in Executive Order 14117 or 28 CFR part 202.

c. Where Client knows or suspects that a country of concern or covered person has gained access to data or material through a data brokerage transaction, a vendor agreement, an employment agreement, or an investment agreement, client will immediately inform Novogene.
